ABOUT

UV digital printing speeds up the print production process by instantly curing specially formulated UV inks on a vast range of materials using UV lamps.

The Printer: Our printer is a Roland VersaUV LEC2-330S-F200.

Print area: 29x59" (your designs can't exceed these dimensions)

Bed size: 32x80" (your material can't exceed these dimensions)

Print height: 6" (meaning we can print on flat items, like acrylic card boxes for example)
